

BERNARD PETER MUSAU

Nairobi, Kenya | +254 769 595 400 | petermusau28@gmail.com

=====PROFESSIONAL SUMMARY=====

Motivated Computer Science graduate with foundational skills in software development, programming, and computer systems support. Completed academic attachment in a university computer lab setting, supporting users and troubleshooting technical issues. Demonstrates strong teamwork and problem-solving abilities and seeks an entry-level role in software development or IT support

=====TECHNICAL & DIGITAL SKILLS=====

- Customer service and user support
- Accuracy and attention to details
- Computer systems use and maintenance
- Software installation and configuration
- Troubleshooting workstation issues
- Microsoft Office (Word, Excel, PowerPoint)
- Python and JavaScript programming fundamentals
- Database concepts (MySQL/MongoDB)
- Web development (HTML, CSS, JavaScript and frameworks)

=====PROFESSIONAL EXPERIENCE=====

IT Support Intern (Attachment) – Catholic University of Eastern Africa, Computer Labs

May – August 2025

- Assisted students and lecturers in multiple university computer labs
- Installed, updated, and configured software applications
- Conducted basic troubleshooting of system and workstation issues
- Prepared workstations and ensured lab readiness before sessions
- Maintained equipment usage logs and supported resource inventory
- Provided customer-focused user support and issue communication

=====EDUCATION=====

Bachelor of Science in Computer Science

Catholic University of Eastern Africa 2021 - 2025

Kenya Certificate of Secondary Education (KCSE)

Mbooni boys High School 2013 - 2016

Graduated 2016

===== ACADEMIC PROJECTS & PRACTICAL EXPERIENCE =====

a) AI-Powered Heart Disease Prediction System – Final Year Project

Python (Flask) · Machine Learning · MongoDB · React.js

- Designed and developed a predictive system to analyze patient medical records using ML models
- Built a Flask-based backend API to handle model inference, data validation, and business logic
- Developed a React.js interface enabling users to input patient data and view predictions
- Integrated MongoDB database for secure patient data storage and model result retrieval
- Implemented user-friendly UI/UX principles to improve data entry flow and interpretation of results

b) Personal Research & Data Management System – In Progress

Vue.js (Composition API) · Node.js · Express.js · MongoDB

- Developing a full-stack research support system with modular services
- Implementing secure role-based authentication and authorization access levels
- Integrating payment processing for premium feature access
- Designing real-time notifications for system events and user actions
- Building backend REST APIs using Express and structuring scalable database schemas
