

Henry Nyagah, Senior Software Developer

NAIROBI, KENYA · henrykariuki003@gmail.com · +254703710518

PROFILE

Henry is a proficient Software Developer, transforming blockchain innovation into real-world solutions, I drives product excellence as a specialized Blockchain Applications Developer. With deep expertise in TypeScript, JavaScript, Node.js, Solidity, and modern frameworks (React.js, Nextjs, MongoDB, Ethers.js, web3.js),

I architect and deliver robust decentralized applications that scale.

My impact extends beyond code – I bridge technical complexity with business value, orchestrating seamless collaboration across cross-functional teams. By aligning UI/UX, engineering, and DevOps initiatives, I've consistently delivered high-stakes projects that exceed stakeholder expectations.

MULTICHAINZ

Senior Blockchain & Backend Developer, Muctichainz

Sep 2024 — Present, Singapore

website: <https://multichainz.com/>

- Spearheaded the development of a pioneering cross-chain token lending platform, enabling seamless multi-chain borrowing and supply of stablecoins and Real World Assets (RWA)
- Architected and implemented the protocol's core infrastructure, designing complex system interactions and integration patterns across multiple blockchain networks
- Led the development and deployment of DAO Governance smart contracts, incorporating comprehensive unit testing and security audit protocols to ensure robust contract integrity
- Engineered and optimized backend API infrastructure, improving protocol performance and enhancing cross-chain data synchronization
- Orchestrated DevOps implementation using AWS and Nginx, establishing a scalable deployment pipeline and maintaining 99.9% system uptime

Blockchain Developer, Gessic

Feb 2024 — Sep 2024, United Kingdom

website: <https://www.gessic.com/>

- Engineered and launched a comprehensive React Native SDK library enabling seamless wallet creation and interaction for mobile applications, now actively used by the developer community
- Architected and deployed gas-optimized "red envelope" smart contracts for UIChat Wallet, reducing transaction costs by implementing advanced optimization techniques
- Developed robust contract interaction libraries and integration patterns, facilitating seamless communication between frontend applications and blockchain infrastructure
- Led cross-functional collaboration efforts to successfully integrate smart contract functionality into UIChat Waller's core infrastructure
- Established standardized testing protocols and deployment pipelines, ensuring consistent code quality and security across contract implementations

Technical Lead, Swypt.io

Jan 2023 — Aug 2024, Nairobi

JavaScript

Nodejs

Defi

Blockchain

Solidity

TypeScript

Nextjs

ReactJs

MongoDB

AWS

Payements Integration

Unit Testing

website: <https://www.swypt.io/>

- Led a 5-member development team in successfully launching a groundbreaking DeFi bridge platform, connecting traditional finance with decentralized protocols
- Architected and implemented robust infrastructure for seamless fiat on-ramps and off-ramps, enabling frictionless crypto-fiat conversions
- Spearheaded the end-to-end development of both frontend and backend systems, ensuring cohesive integration and optimal user experience
- Implemented account abstraction protocols to streamline user onboarding, significantly reducing barriers to entry for non-crypto native users
- Developed and maintained partnership-focused SDKs and APIs, enabling third-party integrations of Swypt's on-ramp and off-ramp solutions
- Drove product development from conception to market launch, delivering a production-ready DeFi platform that bridges the traditional-crypto finance gap

Blockchain Developer, Ngeni.io

Jun 2021 — Oct 2023, Nairobi

Senior Blockchain Developer

Ngeni Labs | Nairobi, Kenya (On-site)

(On-site) June 2021 - October 2023 (2 years, 5 months)

website: <https://ngeni.io/>

- Led Web3 developer training initiatives across Nairobi and Kigali branches, successfully transitioning Web2 developers to blockchain technology
- Architected and deployed high-frequency trading bots for crypto markets, implementing sophisticated trading strategies and market-making algorithms
- Spearheaded a Token IPO initiative, leading team development of ERC20 smart contracts, tokenomics modeling, and market maker implementation
- Established and executed smart contract security protocols, conducting thorough audits to ensure contract integrity and safety
- Developed and optimized MEV bot architectures, conducting in-depth research and analysis of blockchain MEV opportunities
- Engineered robust backend APIs and implemented comprehensive DevOps solutions using AWS (EC2, Amplify, Route53)
- Successfully integrated Web2 payment systems (Mpesa C2B, B2B, B2C) with blockchain infrastructure

Junior Blockchain Developer

Ngeni Labs | Nairobi, Kenya (Contract) April 2022 - December 2022 (9 months)

- Developed and deployed smart contracts for NFT marketplaces using Solidity, implementing comprehensive testing via Foundry and Hardhat
- Built automation tools for token analysis, including scam detection systems and whale wallet activity monitors
- Integrated smart contracts with frontend applications using modern SDKs (Alchemy, Moralis, Wagmi, Rainbow toolkit, Thirdweb)
- Developed specialized trading bots including token snipers, front-runners, and copy-trading systems
- Managed client relationships through specification development, milestone presentations, and technical consultations

Intern Backend Developer

Ngeni Labs | Nairobi, Kenya July 2021 - March 2022 (9 months)

- Engineered automated trading strategies for DeFi protocols including Uniswap and PancakeSwap
- Developed and integrated trading bots with Telegram and Discord platforms
- Conducted comprehensive research on DeFi protocols across multiple blockchains
- Built backend applications supporting market trading bot operations
- Managed trading wallet infrastructure and server operations

Intern Software Developer, PryceML

Mar 2021 — Jul 2024, Nairobi

Software Developer (AI/BI Focus)

Pryce ML | Nairobi, Kenya (Part-time) March 2021 - July 2021 (5 months)

website: <https://www.linkedin.com/company/pryce-ai/>

- Conducted comprehensive research and documentation on AI solutions, focusing on practical business applications and implementation strategies
- Developed business intelligence solutions to transform raw data into actionable insights for decision-makers
- Provided technical consultancy services, bridging the gap between complex AI technologies and business requirements
- Designed and implemented database architectures to support AI and BI initiatives

Technical Focus:

- Artificial Intelligence implementation strategies
- Business Intelligence software development
- Data analysis and visualization
- Database architecture and optimization
- Technical documentation and knowledge management

Software Development Intern, Real Biz Digital

Feb 2021 — Mar 2024, Nairobi

Software Development Intern

Real Biz Digital | Nairobi, Kenya (Part-time) February 2021 - March 2021 (2 months)

- Engineered RESTful APIs to support front-end web applications, ensuring seamless data flow for client projects
- Collaborated on software architecture design, contributing to system planning and technical documentation
- Implemented payment gateway integrations including M-pesa and PayPal, enabling secure financial transactions
- Conducted comprehensive testing and debugging procedures to ensure product quality and reliability

Technical Focus:

- API development and documentation
- Payment system integration
- Software architecture design
- Quality assurance and testing
